Acknowledgments .......................................................... ii
Foreword ................................................................. vi
List of Tables ............................................................ v

1. Introduction .............................................................. 1
   1.1 Scope of This Monograph ........................................ 1
   1.2 Historical Use of Animals in Education ...................... 2

2. The Quality and Integrity of Science Education ............ 5
   2.1 Introduction ........................................................ 5
   2.2 Scientific Literacy in America ................................ 5
   2.3 “Hands-on” versus Active Learning ......................... 7
   2.4 Conclusion .......................................................... 8
   2.5 Recommendations ................................................. 8

3. Sociological Issues ................................................... 9
   3.1 Introduction ........................................................ 9
   3.2 Student Feelings and Attitudes ............................... 10
      Qualitative Studies .............................................. 13
      Squeamishness .................................................. 15
      Desensitization .................................................. 15
   3.3 Teacher Influence ............................................... 17
   3.4 Alienation from Science ....................................... 19
   3.5 Teaching to Care ................................................. 20
   3.6 Recommendations ................................................. 22
4. Animal Dissection in Education

4.1 Introduction

4.2 Prevalence of Dissection

4.3 Procurement and Animal Suffering

4.4 Ecological Concerns

4.5 Formaldehyde Exposure

4.6 Defenders of Dissection

4.7 Alternatives to Dissection

5. Live-Animal Use in Education

5.1 Introduction

5.2 The Life Sciences

5.3 Alternatives to Live-Animal Use

5.4 The Health Sciences
6. Law and Policy Issues

6.1 Introduction
6.2 The Case for Student Choice
6.3 Legal Challenges
6.4 Current Laws and Policies
6.5 International Policy
6.6 Enforcement Problems
6.7 What Constitutes a Good Policy
6.8 Recommendations

7. Conclusion

8. Summary of Recommendations

Literature Cited

Index

Tables

3.1 Published Studies of Attitudes toward Animal Use in Education
4.1 Published Studies Comparing the Performance of Alternatives with Traditional Animal-Based Learning Methods in Life Science Education
4.2 Costs: Dissection Exercises versus Alternatives to Dissection for Commonly Dissected Animals
5.1 Percentage of U.S. Medical Schools with Live-Animal Laboratory Exercises in Various Departments
5.2 Studies Evaluating Alternatives in Veterinary Medical Education
6.1 U.S. State Student Choice-in-Dissection Laws
